About Evolution Petroleum

Evolution Petroleum Corporation (<http://www.evolutionpetroleum.com>) acquires mature, onshore oil and gas resources and applies conventional and specialized technology in enhanced oil recovery, horizontal drilling and unconventional gas to develop incremental reserves, production and value.

Principal assets of the Company include 7.4% in overriding royalty interests and a 25% after payout reversionary working interest in the 13,636 acre Delhi Field Holt Bryant Unit in northeast Louisiana, which is being redeveloped through CO₂ enhanced oil recovery technology. The Company also owns working interests in leases with proved and other than proved, developed and undeveloped reserves covering approximately 24,500 net acres in the Giddings Field in central Texas and two gas shale projects in another state. The Company has commenced its horizontal development drilling program in the Giddings Field, and is actively engaged in developing other projects in its areas of expertise.
